pearly sheen like soft moonlight, and During the earlier years of his married could not keep her alive.

They are making the biggest dirt dam in the world up in Vermont. It is across the Deerfield River in the town of Whitingham. It will be built between two mountains and, in fact, will be a nountain in itself. It will be 200 feet high, 1200 feet long and 1200 feet wide on the bottom. This will impound a lake ten miles long, containing 36,000,000 gallons of water. Within this area of he lake-to-be is the little village of Mill er's Falls, and its sixty odd houses will be moved to a new site on the mountain side, for its present site will be under water to the depth of 200 feet. The river itself will not flow over this dam. but go through a tunnel cut in rock miles. This tunnel will be fourteen feet in diameter. The opening of this tun-nel will be 200 feet above the present rushing torrent. Here will be situated 136,000,000 kilowatt hours annually to the New England Power System; and Mrs. Bertha Packard, the Intermedialso adding each year \$1,700,000 to the ate teacher, who is the only grade teacher gross earnings of the said system.

GREEN DYE FROM CORN COBS

Science has found a way of utilizing all corn cobs, short or long, in the nanufacture of various chemicals. As the corn cob consists of cellulose, which is valuable for making many products, such as celluloid and paper, is considered desirable to save the substance of the cob. The furfural, therefore, is taken from the extract which is obtained by boiling the cob n water and the cellulose can thus

ment to its Record in Use of

Raw Material.

be kept for other purposes. This liquid is employed for many purposes in industrial chemistry, and can be so treated that it will yield a bright green dye, which is much liked by women of fashion, says the Detroit News. Mote and Beam.

Senator Moses, apropos of a certain

monopoly, said at a dinner in Wash-"I am no muckraker. Have you ever noticed that muckrakers as a rule are slightly incrusted with muck? "A politician was taking a swim the other day in the swimming pool of a big ocean liner. A great New York soclety lady-one of those well-preserved society ladies with golden hair, four divorces and a platinum removable bridge-well, this lady was taking a swim, too, and she soon had the politician engaged in talk. Sitting beside

the water, 'and every man has his price. He lets the world know it, too.
"The politician glanced sidewise at the society lady in her ultra bathing dress. Then he said: "Well, every woman has her figure,

GREATEST POWER IN WORLD

Organized Opinion is the Lever Which Makes Possible All Movements for World's Uplifting.

Columbus discovered America, but name of the historian rather than that of the discoverer, M. S. Pittman of Michigan State Normal college, Ypsilanti, Mich., told the National Education association. "Comenius, that great educator of

the Seventeenth century, put his into written form, but I lacked a suitable press agent, and in consequence education lost two centuries of possible progress," said Doctor Pittman. "Publicity is the trailblazer which discovers and marks the paths along which civilization may march with safety. It is the agency by which an established civilization makes known its virtues and its bless-

"The thesis, The pen is mightler than the sword, was once debatable, but not since the art of publicity has been so highly developed. Organized opinion is the world's greatest power, and publicity is the creator of public opinion. Educational publicity, then, all the others act bored, but seem to is the trail-blazer, the light-giver, the think it is the thing to do, and that radio, the opinion maker, the war machine of educational progress.-Ex-

Statements appear at intervals in the press heralding new ways of making rain, preventing rain or fog, or forestalling the disastrous effects of storms. These ideas are not new. Ten Europe were thrown into excitement reflected in their newspapers, over the possibility of a scheme called hailshooting. It was believed that by shooting bombs into the air before an oncoming storm it could be dissipated, thus averting consequent destruction to crops from rain or hail. Contrary to the opinions of the best meteorolo gists a good deal of money was spent The next morning they set out early, in experimenting with hall-shooting, but little is ever heard of it now.

Presence or absence of dust particles n the atmosphere does not, in the opinion of meteorologists, have anyhad grown. He had planned to return thing to do with the distribution b home at once, but the pleasant little rainfall. As a rule, far more dust pareverywhere than would be essential bring about abundance of precipitation On the other hand, enormous quantiwhere there is least dust. Some places nual rainfall exceeding 500 inches, and yet the air is nearly dust free. The most dust in the atmosphere, except near industrial cities, occurs over dry and semi-arid regions.

> Railroads Have Best of It. Assemblyman A. F. Johnson of Chau

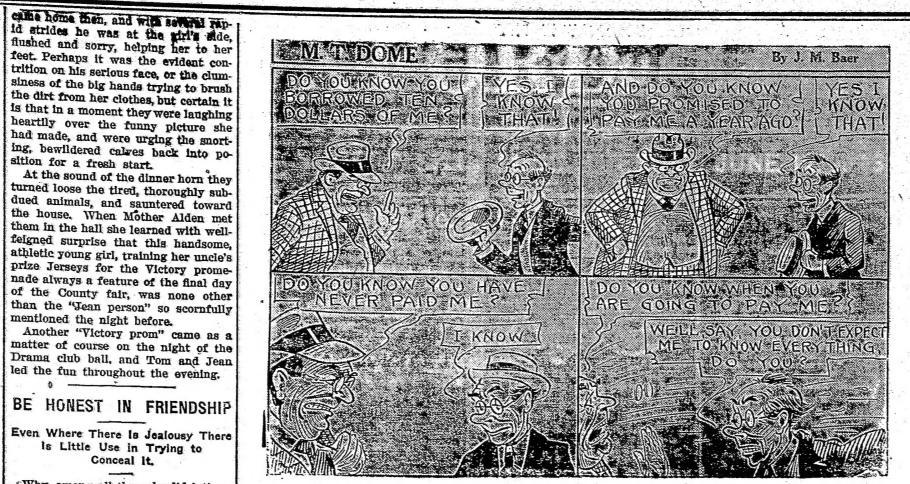

"Back in 1890," he explains, "a law was passed which required railroads and traction lines to cut the Canada thistles, dandellons and other weeds the way his team is speeding along. along their right of way. Labor was cheap then and the law provided that if a railroad failed to do the work the farmer could employ a man to cut the weeds and bill the railroad at the rate

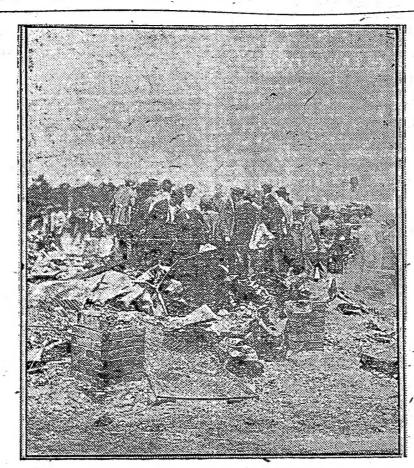

"Now with labor charging \$5 and \$6 a day the companies in many cases find It cheaper to let the farmer do the work. My bill would allow the farmer to charge the road \$8 a day if he has the work done."-New York Sun.

Crown Jewels Cause Argument. The crown jewels of the late Emperor Carl of Austria, valued at \$750,-000, were the subject recently of a lawsuit in the Swiss courts. jewels were attached by two jewelers, one from Frankfurt and the other from Paris, who claimed they had not received their full commission. The Swiss judge dismissed the case

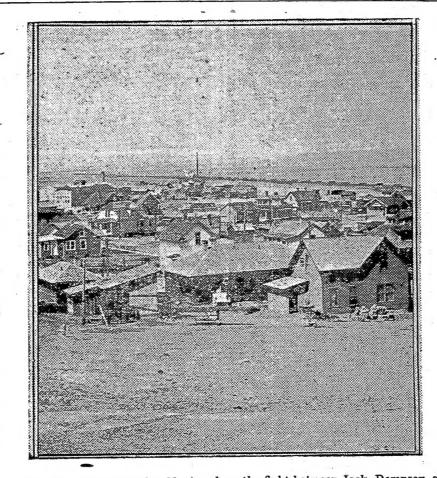

with costs and the jewels are to remain in a Swiss bank until their ownership has been established. Both ex-Empress Zita, widow of Carl, and the Hungarian government are conevery football victory of his team a cerned in the final disposal of the

A VICTORY FOR **AMERICAN MOTORISTS**

The Crude Rubber Monopoly weakened when it came into contact with aroused public sentiment. The press of the country today reflects the determination of the American motorists that tire prices shall stay at a reasonable level-and that America must produce its own rubber.

rifesione

CUT TIRE PRICES 10 PER CENT **EFFECTIVE JUNE 11**

We announce a 10 per cent reduction in tires and tubes effective June 11. The lowered cost of crude rubber and the special Firestone manufacturing and distribution advantages make this possible.

Firestone factories are organized on a basis of large volume and effective production. Costs are down but quality is at its peak. Stockholder workmen are daily building many thousand of Gum-Dipped Cords—the best Firestone ever produced and, we believe, the leader

Most Miles Per Dollar

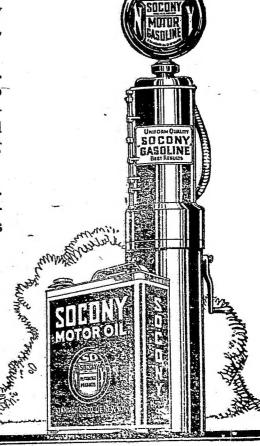

NE afternoon last summer, I was looking out of a store window on the Post Road. A heavily loaded truck happened to be coming along. Maybe a hundred and fifty yards or so up a side street, a low-hung touring car pulled out of a yard and the driver hit it up for the Post Road as though he had to make a train in thirty seconds. Matter of fact, he was just taking 'the sweetest, dearest, etc.' out for an afternoon spin.

"The truck and sport car got to the corner at the same time. No horns, no slowing up. Then a last minute struggle to avoid colliding. I think one of them must have had a horseshoe under his seat, for it was just about as close as I'd ever seen, or want to. As it was, one of the steering knuckles on the car was snapped in the shuffle

"Not a reason under the sun for it, just plain carelessness. And that's what causes three-fourths of all motoring accidents today. Take it from me, it pays to stick to the rules of the road nowadays - all of them - all the time."

REALISM HAS ITS DRAWBACKS Principal in Carefully Prepared Sonsation Balked When He Read Reporter's Glowing Story.

It happened a good many years ago in a northern Indiana county seat and the actors were a newspaper man, now in a responsible position on the staff of one of the great newspapers of the South, and an amiable ne'erdo-well with a police record as long as his arm who may he known as

John Doe. The county jail was a great resort for the reporters of the town and one quiet afternoon the reporter in question was struck with the idea of manufacturing some news. John, who was doing one of his periodical penances, agreed to assist. For a consideration John was to improvise a rope from his bed clothing and feign an attempt at suicide with the understanding that his reporter friend should arrive at the crucial moment and cut him down.

The "story" was prepared with careful attention to corroborative detail, the type was set and the hour of the hanging was fixed for press time, to keep the "news" from the rival paper.

In the afternoon John took a notion, so to speak, to read his own obituary. A proof was given him and then the story blew up.

"If you think I'm going to gasp and struggle like it says here, you've another think coming," quoth John. The account of his attempt at suicide was too realistic and proceedings stopped right there. - Indianapolis

WONDERFUL PIECE OF WORK Few Realize the Amount of Material and Labor In Audio-Frequency Transformer.

Little does the average radio novice realize the elaborate workmanship which enters into the usual audio-frequency transformer. Indeed, the low price of such devices tends to conceal their elaborateness, but the low price is due solely to a cut-throat competition which brings down selling prices irrespective of quality and cost of mannfacture. Thus one of the best known transformers on the market has 3,800 turns of No. 40 enameled wire for the primary winding. Glassine paper is used between layers, and a one-eighth inch paper projection on each end serves for mechanical protection. The secondary winding is separated from the primary winding by three thicknesses of .005-inch moleskin paper, and wire with the same insulation and end protection. The primary and the secondary leads are 16 strands of No. 88 bare copper wire stranded together and covered with one wrapping of green silk. The coil is impregnated under vacuum process in a compound consisting of beeswax and rosin, and is covered with black pebbled book-

Ridding County of Prairie Dogs. A rodent drive in Hat creek community, Niobrara county, Wyoming, recently resulted in about half the cooperators ridding their land of every prairie dog, while each of the others had, at the time of reporting, but four or five live rodents left. Not 100 live prairie dogs, it is estimated, are left on this area of about 25,000 acres, which was literally alive with them six months ago. The work was started in April on a strip of land thirteen miles long and three miles wide, with twenty-two ranchers co-operating. Practically every man in the district signed up to do his share of the poisoning. The county appropriated money to be used in purchasing poison for the state and nonresident lands, the biological survey furnished polson for the federal land, and labor was donated by interested residents.—Department of Agriculture Bulletin.

English Royal Marriages Statute law gives an English king larger powers than any other head of a family in supervising matrimony Under the terms of the royal murriage act of 1772 no descendant o George II (except the issue of prin little wrinkles between her eyebrows. cesses marrying into foreign families is capable of contracting matrimonwithout the consent of the reignin; sovereign, subject to an important sav ing clause which the wisdom of par

liament dictated. A member of the royal family may marry in spite of the sovereign's veto if he or she has reached the age of twenty-five, and has given 12 months notice to the privy council. Where these conditions are fulfilled the mar riage is valid, unless both houses of parliament declare their disapproval

Landed Heavy Sprat Catch One of the largest harvests of sprats ever recorded was caught by Deal fishermen lately, and is estimated to number 2,500,000 fish. Owing to the recent heavy gales the sprats became massed in abnormal quantities, and the fishermen had great difficulty in landing their catches, so weighted and choked were the nets. Many of the hoats reached shore almost submerged Thousands of hungry seagulls swept down on the floating nets and devoured many of the fish, despite the efforts of Fil have Bess bring him over some a man of integrity and sound judgpoor of the district benefited by the generosity of the Deal men.—London Mall.

GREENLAND ALWAYS ON MOVE

Observations Made by Danish Scientist Prove That Continent is Progressing Westward.

It was not necessary to wait until the North pole had been discovered to earn that the location of the poles is constantly subject to change. It shifts about considerably, never wandering far at a time, but this wobble has been watched for years by the scientists of the world, and recently there has been more learned about the erratic conduct of the North pole than ever before, through the expedition of a Danish scientist, Doctor Jansen. He has passed many months in making infinite measurements and observations over the length and breadth of Greenland, and has come to the conclusion that the movement of the pole is more than a wobble—it is a very well-defined and constant movement, and incidental t this the whole of the Greenland continent is moving westward at the rate of 20 yards a year. These discoveries seem to indicate conclusively that the cold countries of the North will at some more or less remote day become

BUILDS ITS NEST ON ROCK he returned it, and began awkwardly Peculiarity of South American Bird Which Is Much Sought After for Its Plumage.

warm countries and comfortably habit-

Cock of the Rock is a remarkable bird of northern South America, so called from building its nest on rocks, It is about the size of a large pigeon The male is almost purely orange I plumage and has a remarkable fla sided crest. The female is of a dul olive brown, and is uncrested. The birds inhabit rocky water courses and bushy hillsides, where they remain close to the ground and build the nests, largely of mud, on some roci The males court the females by as sembling for "dances" in certain cleared spaces, each displaying its showy plumage by queer antics unti chosen by some observant hen. Great numbers of the birds ar killed annually, as their skins no only command a high price for millinery purposes, but are much em ployed by the Indians in making variety of beautiful decorations. They are thus becoming rare. A large stat mantle, formerly worn by the emperof Brazil, was entirely composed their feathers. The flesh of the birds is well flavored, but of a very peculiar color, being bright orange red.

FIRMLY BELIEVE IN "SPIRITS" Odd Superetition That Prevails Among the inhabitants of the island of Luzon.

During the life of a person in Luzon his spirit is called Tako. After death it receives a new name. It is believed to go about in a body invisible to the ance from the living person. If a man becomes unconscious, the natives think a vengeful spirit has lured away the soul of the sick man and they hold the ceremony of "Calling Back the Soul." Then they hold a big feast, to which a profit. they invite all the spirits in order to induce them to bring back the sick man's soul.

One is "insupak" when the spirits have made themselves known to him in a dream. He thereby declares himself to be "insupak," and as no one can prove he has not received a message from the dead he becomes a full-fledged medium. A pronged spear is supposed to protect the people from the evervengeful Anito, or evil spirits, who are always waiting to trip one up on the trail, to cause him to fall and hurt himself or to kill him. When a native walks alone on a mountain trail and feels his hair creeping on his scalp he knows of the Anito's presence.

He Found Out. An old Yarmouth fisherman settled in the east end of London. On look ing over his procer's bill he occasion ally found charges like the following: "To 1/4 lb. tea-to 1/4 lb. ditto."

business; I should like to know what you have done with so much of this here ditto." "Ditto, ditto," replied the old lady "Never had a pound of it in the hous in my life!" / ·

So back went the ex-fisherman i charged for things he had never re-"Mr. Brown," he said, "I shan" stand this. Wife says she hain't had

The tradesman thereupon explained the meaning of the term and the old eight boilers having a combined rating man went home satisfied. of 2,100 horse power. His wife inquired if he had discov ered what ditto meant.

"Yes," he said. "It means that I

am an old fool and you're ditto."-London Tit-Bits. "E Pluribus Unum."

The motto of the United States, "E Pluribus Unum," is a Latin phrase which means "Out of Many, One." It appeared first on the design of the Great-Seal recommended to the Continental congress July 4, 1776, by a committee composed of Franklin, Adams and Jefferson. The motto appears on several coins, though it has never been officially approved for this

for the ladies and a suspicious wife." | and \$25 worth of dynamite will blow "When I left both begged me to stay of solid silver. and both meant it." "You must have brains."—Birmingham Age-Herald.

A Model of Discretion.

"Are you a competent chauffeur?"

Fair Enough. "I would like to get a mirror for my its opportunities, in the future and office desk. Can you suggest some its promises, and in the divine joy of thing?" "We still have a few polished steel trench mirrors, sir. You may look into one of them, sir, and if you make

SAVED MONOPOLY IN PIPES Clever Trick Credited to Dutol Traders Who Had No Desire to Lose Lucrative Business.

There is a story to the effect that once the Dutch had a profitable monopoly in the manufacture of smoking pipes. Flanders, in a desire to cultivate craftsmanship for economic reasons, decided to make pipes, too, and quit sending money to Holland for such articles. In that way, it was planned Flanders could not only keep Flan ders money at home, but the country could sell its pipes to other people at

So the manufacture of pipes began Seeing what this competition might lead to, the Dutch said: "We will sell our pipes at a loss in Flanders until this upstart industry shall have been ruined. Then we can raise the price higher than before." To this the people of Flanders retorted by laying a prohibitive tax upon Dutch pipes, to keep them out. Thereupon the Dutch loaded a ship with pipes, sailed it over to the coast of Flanders, and wrecked it there. It was salvaged, of course, and the people of Flanders got a shipload of pipes for nothing. For the next two or three years pipes were so rulnously cheap in Flanders that the new industry perished.

Thus the Dutch, by sacrificing one shipload of pipes, saved their mo-Monster Smokestack.

A monster smokestack which stands 257 feet in height, thus taking rank among the tallest in the country, has "Wife," said he, "this 'ere's a putty recently been completed for the University of Kansas at Lawrence, and is the subject of a brief illustrated article in Popular Mechanics. The reenforced concrete stack was erected to serve the new heating and power plant recently completed at a cost of \$300,-000. On a clear day it is said that high dudgeon that he should have been Topeka, some forty miles west, and Kansas City, about forty-six miles east, can be plainly seen from the top. The square brick stack of the old power plant, built in 1908 to a height a pound of ditto in the house in her of 127 feet, then considered great, is entirely overshadowed by the new chimney. It will furnish draft for

> Farmer Invents Kaferita: A new kind of kaffir corn has been developed by Walter Pierce, a Reno county farmer, in Kansas, by crossing kaffir and feterita. The new grain matures fifteen days earlier than kaffir and does not shell out like feterita does. The development was made by Mr. Pierce in co-operation with the experiment station of the Kansas State Agricultural college after several years' work, and the new crop has been named kaferita.

Rich Silver Mine. One side of a vein of the Keeley mine at Cobalt, Ontario, is plated with a sheet of pure silver, from a quarter inch to an inch thick. This sterling silver is 12 feet long and is exposed for a height of eight feet, and may be high-"I drove for a man who had an eye er. It is estimated that eight hours

> Bellef Worth Helding. I believe that every hour of the day we receive a just reward for all we do. I believe in the present and living.-Grover.

Not Easy to Assimilate. Much of the food for thought that is even a dent in it you may have it free offered gratuitously is indigestible.-

of charge."-Houston Chronicle. STATE OF MAINE.

Treasurer's Office, Augusta, May 7, 1923.
Upon the following townships or tracts of land in Oxford County not liable to be taxed in any town, the following assessments have been made for the State, County and Forestry District Taxes for the year 1923.

An Exaggerated Report.

On the first page of this paper is already printed a paragraph which states that Stephen Russell is ill with measles at East Sumner. The only trouble with the paragraph is that it ain't so. He is at East Sumner, and he has been exposed to the measles, but at latest authentic report from him showed no sign of having them. This matter illustrates how easily some items of news

ORDER OF NOTICE THEREON. get exaggerated. The alleged information in the first page paragraph came to the Democrat with such apparent authenticity that it never occurred to an ordinarily cautious newsgatherer to question it or seek for confirmation of ft. Few who have not had actual experience at it realize the amount of work often necessary to make safe the publication of an inconspicuous item of news which is so well established that "everybody knows it."

DISTRICT OF MAINE, 8s.

On this 16th day of June, A. D. 1923, on reading the foregoing petition, it is or reading the foregoing petition, it is further ordered by the Court, That a hearing be had upon the same on the 20th day of July, A. D. 1923, before said Court at Portland, in said District, at 10 o'clock in the forenoon; and that notice thereof be published in the Oxford Democrat, newspaper printed in said District, and as District, and and show cause, if any they have, why the prayer of said petitioner should not be granted. And it is further ordered by the Court, That the Clerk shall send by mail to all known creditors copies of said petition and this order, addressed to them at their places of residence as stated. DISTRICT OF MAINE, 88.

Witness the Hon. John A. Peters, Judge of the said Court, and the seal thereof, at Portland, n. said District, on the 16th day of June JOHN F. KNOWLTON, Clerk. A true copy of petition and order thereon.

Variations in Shortcake. Strawberry Shortcake crowns the early summer feast with a grandeur almost equal in splendor to that radiated by a theless a fitting one to use when describ ing strawberry shortcake, as it is the dessert par excellence while strawber ries are in season. We view with regret the waning of the strawberry season and feel like echoing a sentiment of one of the early writers who said, "Doubt less God could have made a better berry but doubtless God never did." However, scarcely before the la strawberry has left us, other berries and

fruits appear in our markets, many of which lend themselves to the making of shortcakes. Among them we find rasp ples. Shortcakes are not necessari spring and summer desserts, for cannel fruits may well be used in their making But shortcake is synonymous with straw berries, and we therefore associate with the early summer season.

Shortcakes are of several varieties.
Some are made from a baking-powder foundation, and such are known as "oldfashioned" shortcakes, while others ar made from a plain, white-cake founda

tion. Shortcakes may be served in the form of one large cake, or baked in indi-vidual size. Whipped cream in gener-ous quantity and a sauce of the fruit juice usually add the finishing toucher For Old Eashioned Shortcake, measur

and sift together two cupfuls of sifted bread flour, four teaspoonfuls of baking powder, and one teaspoonful of sal Then work in five tablespoonfuls of any good shortening, using two knives in cutting motion until the mixture resem bles a coarse meal. Then add very grad ually about three-fourths cupful of mill or enough to give the mixture the con aistency of a soft dough, working the liquid in with a knife. Toss the dough on a floured board and divide into two parts. Pat each part out into a round and bake in greased layer-cake time o on a baking sheet. Bake at 450° F. fo fifteen minutes or until golden brown color. Split the baked cakes and aprea them with butter. Then they are read for filling. For individual, old-fashioned shortcakes, roll the dough out to one inch thickness and cut in rounds a little larger than ordinary baking-powder bis cuit. Bake at the same temperature a the larger cake. Many prefer a cake foundation for

Strawberry Shortcake, and to such the following recipe will be pleasing: Cream together one half cupful of butter and The masterpiece of one of the world's greatest writers—and an ideal role for Tommy Meighan. With a great cast including LILA LEE. A real special if there ever was one.

Comedy—"Howling Success."

Pathe Review.

One cupful of sugar. Add two egg-your well beaten. Sift together one and one-half caspoonfuls of pastry flour, two and one-half teaspoonfuls of baking-powder, and one-fourth teaspoonful of salt, and did to the mixture alternately with one-half cappful of milk. Beat two egghalf cupful of milk. Beat two eggwhites until stiff and fold in carefully together with one-fourth teaspoonful orange extract and one-fourth teaspoon-ful of vanilla extract. Bake in layer tins at 375° F. for twenty minutes. The mix-Can you imagine Tom Mix in the role of a "Sheik"? You'll see a desert lover at 375° F. for thirty minutes. The cup cakes may be used for individual service by splitting them through the center. For Strawberry Filling and Sauce, on quart of strawberries will be sufficient for six servings. Wash and hull the strawberries, then set aside a sufficient number to be used for decorating the top of the cake. Mash or coarsely chop the remainder and add enough sugar to Saturday, June 23, Matinee at 2, Evening at 6:45 and 8:30 give the right depending upon the natural sweetness of the berries. Let the mix ture stand until the sugar is dissolved. Place part of the filling on one of the layer. Place more filling on the top layer of the cake, cover with whipped cream, and decorate with large, whole berries. Pour the juice from the sauce around the bottom of the cake, and it is then ready to serve.

Raspberries, peaches, apricots, and pineapple, when used as filling for shortcake, are prepared in the same manner. When canned fruits are used, the fruits should be drained and out in pieces. A delicious filling for shortcake may be made by combining strawberries and shredded, fresh pineapple. Add about one-half cupful of sugar to one pint of strawberries sliced, and about one-half cupful of sugar to one pint of sbredded pineapple. Allow the fruits to stand in separate dishes, and when the sugar has dissolved, spread the layers with the mixture. Cover the cakes with a sirup made by boiling together one cupful of sugar and one-half cupful of water for bout ten minutes or until a heavy sirup is formed. Remove from the heat and add one and one-half tablespoonfuls of lemon juice and two teaspoonfuls of but-

Recipes.

SPANISH POTATOES. Peel, and put through the ricer, enough white potatoes to fill a quart measure. Dissolve, in one-half a cup of nilk, one teaspoonful of salt and three tablespoonfuls of butter, and add this t one cup of canned pimientoes, measure after being cut into pieces and sifted.
Mix this with the riced potatoes, and
beat the whole together, adding a little
more hot milk, if necessary. The mixture should be of the consistency of
mashed potatoes. Pile into a greased
vegetable dish, set into the oven until
there is the first light touch of brown on there is the first light touch of brown or the top, and the whole is heated through out; sprinkle with chopped parsley be

BOAST CHICKEN. Clean, stuff and truss a chicken sprinkle with salt. Cream two tablespoonfuls of butter, mix with two tablepoonfuls of flour and spread on breast, rings, and legs of the chicken. Bake in a double roaster in a moderate oven one hour and one-half. Garnish with toast

points, parsley and lemon. HAMBURG STEAK WITH ONION BINGS. Pass two pounds of round steak brough the meat-cutter and mix thoroughly with one teaspoonful of salt, onefourth a teaspoonful of pepper and one cup of cold water; pat into a shape hav-ing edges of same thickness as the center, and let broil two minutes; place in a hot oven for ten minutes. Cut onehalf-inch slices from onions, separate into rings and fry in deep fat to a del cate brown; sprinkle with salt. BAKED STUFFED MACKEREL.

wash and dry mackerel. Mix one cup and one-half of soft bread crumbs, one tablespoonful of melted butter, one teaspoonful of minced onion, half a small gherkin, chopped fine, one half a teaspoonful of salt. Use as stuffing for fish and sew up opening with a trussing needle. Brush over the bottom of a baking pan with butter; in it set the fish:

Is Ford Behind It?

It is thought likely that John W. Slack, president of the Columbia Postal Supply Co., who presented the bid of \$1,051,000,000 to the United States Shipping Board for the entire merchant fleet of the government, might be acting for other interests, and this belief was in a measure confirmed when it became known that Henry Ford was recently a visitor at Silver Creek, N. N., the head quarters of Mr. Slack.

PLAYGOER SOUNDS A WARNING Like a Great Many of Us, He Is Tired of Stage Scene That Has Been Overdone.

I'm just like you, I'm getting fed ip on all these who-fired-the-shot-inthe dark plays. You know: the stage blots out-there's a bang-and when the lights flash on again, the old miser- Yes, that's it. And then we have to guess who fired the shot. I always go at the thing logically and analytically. The miser, I pre-

mise, has been shot. Then I proceed: who shot him? But that leaves me with the problem: who is who? So recapitulate and, to throw new light on the thing, restate the whole prob-lem; was he shot by whom? Or is it who? And who is who? But that's the same "who is who" I had before. Or whom? No, no; whom was it shot who by-

And at that stage I always give up cold ratiocination and settle back to wait till the playwright confesses. By this time I don't much care who killed the ghastly miser anyway. Nor does anyone, else. And yet for almost three solid hours, they continue But, as I say, I'm fed up. And

the next time-I give fair warningthe very next time they provoke me by that stunt of turning out the lights at the critical moment, they're never going to find out who shot the old miser. I'm going to shoot him myself. -G. R., in Life.

Needless to Say. I had been married but a short time and was keeping house in a strange town when the minister called early

I had been away from home for a few days and had neglected to dust the house upon my return. As it was almost dusk when my caller arrived, I hoped he would leave before it became necessary to turn on the lights. But as it grew darker and darker, until finally we could scarcely distinguish any article in the room, I excused the darkness by saving the connection had not been made in that Just as the minister declared he

must be going my husband returned unexpectedly from town, and, turning on the light as he entered the room exclaimed, "Why all the darkness?" That minister never saw me among his congregation after that.-Chicago

Defining Its Status.

Senator James W. Wadsworth New York tells this story in the New York Herald: "Some years ago the rmy appropriation-bill carried a rider providing for the retirement, with full pay, of a certain brigadier-general. The rider was opposed by some members of the senate, chiefly because it was speclal legislation. It caused considerable "Hoke Smith, then in the senate from

leorgia, finally made a point of order "Thomas R. Marshall, who was vice resident, was in the chair and asked senator Smith to state the point of or-"'It is general legislation,' Senator

Smith declared. "'Overruled!' snapped Vice Presi lent Marshall; 'It is brigadier-general

Radio Crooks' Nemesis. The installation of radio receiving apparatus by police departments of various cities is gradually forming a network of communication that will undoubtedly prove to be a mighty actor in the apprehension of law-reakers. The more important points in the border of the United States, andda and Mexico are now well nked by the new means of communition.

Stray Bits of Wisdom.

None are so food of receiving apparatus by police departments of various cities is gradually forming a network of communition.

HURT BY BURSTING FUNGUS

Expleding Puffball Cause of Somewha

Unusual Accident at Valenciennes, French City.

At Valenciennes, France, two people have been rendered so ill by the burst-

ing of a giant fungus that medical aid

was required. The fungus was a huge

puffball (Calvatia), a species which is

often considerably larger than a man's head. The fungus which was growing

in the wainscoting of a workman's

cottage suddenly burst open releasing

enormous numbers of spores. An idea

of the vast quantities of spores pro

duced by these puffballs may be gath-

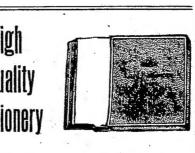

enterprises in Alaska is the blue-fox in dustry, judging from the organization gatherings recently of 40 fox farmers at Cordova, 29 at Petersburg and 18 at Ketchikan. The three meetings were attended by a representative of the biological survey, United States Department of Agriculture, in the course of an investigation of the status of fox farming in the territory. From his report there is every reason to believe that the industry will develop on a large scale. It is of peculiar value to the Alaskan coast, as it utilizes the barren outlying islands which are of no particular value agriculturally or for any other profitable industry. Foxfarming serves to link these islands with each other and with the coast towns near by. The biological survey is of particular service to the fox farmer in giving advice in regard to diseases of his animal and the extent to which the islands may be stocked. What Was Missing?

Jimson had longed for many years to go back to the old swimming hole where, in his boyhood days, he spent so many wonderful hours. He wanted to sit on the mossy bank once more and thrill with the thoughts of bygone days. At last the opportunity came and

with a happy heart he journeyed back, hundreds of miles, to the old spot he remembered so well. The place had hardly changed. The old swimming hole looked just about the same, the mossy bank was just as mossy as in the old days. Jimson sat down on that bank and gazed at the old swimming hole once

dust and dirt so readily? The reason is that ordinary paint has a rough, porous surface. Smooth enough in appearance it is actually full of countless tiny pores and crevices in which dirt clings, Once soiled no washing or scrubbing can get it thoroughly clean.

Barreled Sunlight is a white paint made by a special process which produces a smooth, lustrous, unbroken finish that offers no lodging place for dust or dirt. A damp cloth will wash it clean as readily as tile. This paint costs less than enamel, requires fewer coats and remains

white longer. It is also much easier to apply. It flows readily and leaves no brush marks. In hotels, apartments, restaurants, homes—all interiors wherever light and cleanliness are desired—use Barreled Sunlight. Comes ready mixed in cans, from half-pint to five-gallon size-bar-

rels and half-barrels. U. S. GUTTA PERCHA PAINT CO.
